## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to because:

a.) In Fig. 1, the items contained need to contain a text label. It is office policy to request from applicants that submitted figures contain both text and numerical labels to allow individuals viewing each figure to be able to determine the designation of each element in the figure without having to go into the specifications.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

2. Figures 1 - 4 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

Art Unit: 2634

3. The abstract of the disclosure is objected to because:

a.) Examiner suggests applicant delete line 16 “(Figure 6)”.

Correction is required. See MPEP § 608.01(b).

4. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

***Allowable Subject Matter***

5. Claims 1-18 are allowed.

6. The following is a statement of reasons for the indication of allowable subject matter:

The instant application relates to a method of processing multipath-propagated signal components of a signal in a communications system. A thorough and exhaustive search of prior art records has failed to teach a method or a computer program product to cause a microprocessor to perform a method of processing multipath-propagated signal in a communications system comprising “matching the one or more taps to a second matched filter shorter than the first matched filter, calculating a weighting value for the impulse response using statistical methods on the basis of the one or more taps in the second matched filter, comparing a deviation between the weighting value and a centre point of the second matched filter with a threshold value set for the deviation, moving the second matched filter forward when the

Art Unit: 2634

deviation exceeds the threshold value set for exceeding the deviation, moving the second matched filter backward when the deviation undershoots the threshold value set for undershooting the deviation, and repeating the calculating a weighting value, comparing a deviation, moving the second matched filter forward moving the second matched filter backward during reception of the signal” along with the remaining limitations of claims 1 and 13, respectively. Neither does the prior art teach ” a RAKE receiver in a communications system, which receiver comprises: means for matching the one or more taps to a second matched filter which is shorter than the first matched filter, means for comparing a deviation between a weighting value and a centre point of the second matched filter with a threshold value set for the deviation, means for moving the second matched filter onward when the deviation exceeds the threshold value set for exceeding the deviation, means for moving the second matched filter backward when the deviation undershoots the threshold value set for undershooting the deviation, and means for repeating the last four steps during the reception of the signal” along with the remaining limitations of claim 7.

### ***Conclusion***

7. This application is in condition for allowance except for the following formal matters:
  - a.) Drawing objections as noted above.
  - b.) Specification objections as noted above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 2634

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
